

REACH CONFORMITY

VPF products comply with REACH Regulation

VPF products meet the legal requirements of Regulation (EC) No. 1907/2006 on the Registration, Evaluation, Authorisation and Restriction of Chemicals as such or in mixtures (REACH regulation). Since these are classified as article in the sense of the REACH regulation and do not release any substances when used as intended, VPF products do not have to be registered with the European Chemicals Agency (ECHA). In addition, VPF is a downstream user.

VPF products do not contain any substances that are listed in Annex XIV of the REACH regulation (list of substances subject to authorization). Furthermore, only very few of our products contain SVHC (Substance of Very High Concern) in extremely low concentrations, which are listed in the candidate list. The product information for the relevant products contains further information.

According to Article 33 of the REACH regulation, our EU suppliers are obliged to actively inform us if the raw materials they purchase contain an SVHC (> 0.1%). The same applies, of course, to VPF.

In close cooperation with our suppliers, we will continue to ensure compliance with legal requirements in the future. On this basis we promise our customers:

VPF products comply with REACH Regulation requirements.
